Smart Technology Solutions for Restaurants & Retail

POS System

Cloud-based, ZATCA compiled phase 1 & phase 2 (Online & Offline support).

Cloud Kitchen - Brand Management

Launch and manage multiple brands from a single kitchen with centralized control over orders, menus, & sales through a unified POS system—boosting efficiency & streamlining your operations.

Operating Systems

Fully compatible with **Windows**, **iOS**, and **Android**.

Windows

iOS

Android

Call Center

Streamlined order taking for high-volume phone operations.

KDS (Kitchen Display System)

Digitalized order routing (Kitchen Display System), syncs with your POS and streamline kitchen workflows.

Table Management

Floor maps, Table reservations, and real-time table status.

Franchise Management

Centralised management of all franchise branches, brands and sales from one master dashboard.

Delivery Integration

Connect your restaurant directly to delivery platforms—such as Jahez, HungerStation, The Chefz, and Meta—to receive orders and manage invoices and orders with ease and efficiency.

Inventory

Track every item and stock level in real time to eliminate stockouts and waste.

Cost Control

Achieve full inventory control from receipt to sale, automatically tracking ingredient costs and monitoring margins to plug profit leaks.

Accounts

Streamline daily sales, cash flow, and automated financial reporting without the stress.

Our Story

Noqqat SmartTechnology was founded with a passion for excellence, specializing in intelligent Point of Sale and resource management solutions for the Food & Beverage and retail sectors. From our very first year, we earned the trust of clients across the Kingdom — a milestone that led us to open a second branch in Riyadh. Today, Noqqat is one of Saudi Arabia's most trusted POS technology partners, serving SMEs and enterprise restaurant chains alike.

Tech Support

ZATCA

Phase 1 & 2

Mission

Provide intelligent tech solutions for hospitality, restaurants, cafes and retail to improve branch performance, ease management and maximize financial returns.

Vision

To become a globally leading POS company aligned with Saudi Vision 2030 — serving as the primary hub for Arabic POS systems regionally and internationally.

Values

- Client satisfaction is our top priority
- Professional respect and hard work
- High efficiency and precision
- Team spirit and collaboration

Common Challenges in F&B & Retail Operations

Multi-Channel Order Complexity

Dine-in, takeaway and delivery orders managed separately cause delays and errors across branches.

No Real-Time Branch Visibility

Managers struggle to monitor live sales and operations across multiple locations simultaneously.

ERP Integration Challenges

Connecting POS to Oracle ERP or Microsoft Dynamics often requires significant time and resources.

ZATCA Compliance Requirements

Phase 1 & 2 e-invoicing demands certified, continuously updated software to avoid penalties.

Cloud SaaS Platform

Any device · Auto-updates · Subscription pricing · Multi-tenant security · No servers needed

Noqqat POS is a cloud-based point of sale system purpose-built for restaurants, fast food chains, cafes, sweet shops and retail outlets. Certified by ZATCA (Phase 1 & 2) online & offline, it supports multiple order types, full device compatibility and seamless kitchen integration — all managed from one screen.

Compatible Devices

Android

iPad / iOS

Windows PC

Key Features

Order Management

Manage dine-in, takeaway, delivery, Behest, reserve invoices call center, reservations, and kiosks from a single screen. One central dashboard, zero system switching.

Table Management
